Contents

Preface	v
1. On the Photon Mass Written together with I. Yu. Kobzarev, <i>Soviet Physics Uspekhi</i> 11 (1968) 338–341.	1
2. Mass, Energy, and Momentum in Einstein's Mechanics $\alpha, \beta, \gamma \dots Z$. <i>A Primer in Particle Physics</i> (Harwood Academic Publishers, 1987), pp. 9–13.	5
3. The Concept of Mass <i>Physics Today</i> , June 1989, pp. 31–36.	11
4. Putting to Rest Mass Misconceptions Reply to Letters of W. Rindler, M. A. Vandyck, P. Murugesan, S. Ruschin and C. Sauter, <i>Physics Today</i> , May 1990, pp. 13, 115, 117.	17
5. The Concept of Mass (Mass, Energy, Relativity) <i>Soviet Physics Uspekhi</i> 32 (1989) 629–638.	27
6. The Fundamental Constants of Physics <i>Soviet Physics Uspekhi</i> 34 (1991) 818–826.	37
7. The Problem of Mass: from Galilei to Higgs <i>Physics at the Highest Energy and Luminosity: To Understand the Origin of Mass</i> , ed. A. Zichichi (Plenum Press, New York, 1992), pp. 1–24.	47
8. Vacua, Vacuum: Physics of Nothing <i>Proc. of a NATO Advances Research Workshop on the History of Original Ideas and Basic Discoveries in Particle Physics</i> , Erice, Italy, July 27–August 4, 1994, eds. H. B. Newman and T. Ypsilantis (Plenum Press, New York, 1995), pp. 67–72.	71

9.	Note on the Meaning and Terminology of Special Relativity <i>Eur. J. Phys.</i> 15 (1998) 403–406.	77
10.	On Relativistic Apple: Exchange of Letters with M. R. Kleemans in August 1998	81
11.	Current Status of Elementary Particle Physics <i>Physics–Uspekhi</i> 41 (1998) 553–557.	85
12.	Gravitation, Photons, Clocks Written together with K. G. Selivanov and V. L. Telegdi, <i>Physics–Uspekhi</i> 42 (1999) 1045–1050.	91
13.	On the Interpretation of the Redshift in a Static Gravitational Field Written together with K. G. Selivanov and V. L. Telegdi, <i>Am. J. Phys.</i> 68 (2000) 115–119.	97
14.	Photons and Static Gravity <i>Mod. Phys. Lett. A</i> 15 (2000) 1941–1947.	103
15.	A Thought Experiment with Clocks in Static Gravity <i>Mod. Phys. Lett. A</i> 15 (2000) 2007–2009.	111
16.	Relation between Energy and Mass in Bohr’s Essay on His Debate with Einstein <i>Physics of Atomic Nuclei</i> 64 (2001) 536–539.	115
17.	Trialogue on the Number of Fundamental Constants Written together with M. J. Duff and G. Veneziano, <i>J. High Energy Phys.</i> 0203 (2002) 023–053.	119
18.	Photons, Clocks, Gravity and the Concept of Mass <i>Nucl. Phys. B (Proc. Suppl.)</i> 110 (2002) 151–155.	151
19.	Spacetime and Vacuum as seen from Moscow <i>Proc. of the Inaugural Conf. of the Michigan Center for Theoretical Physics “2001: A Spacetime Odyssey”</i> , Univ. of Michigan, Ann Arbor, USA, 21–25 May 2001, eds. M. J. Duff and J. T. Liu (World Scientific, 2002), pp. 105–118.	157
20.	Critical Velocities $c/\sqrt{3}$ and $c/\sqrt{2}$ in General Theory of Relativity Written together with S. I. Blinnikov and M. I. Vysotsky, <i>Physics–Uspekhi</i> 46 (2003) 1099–1103.	171

21. Fundamental Units: Physics and Metrology <i>Astrophysics, Clocks and Fundamental Constants</i> , eds. S. G. Karshenboim and E. Peik, <i>Lect. Notes Phys.</i> 648 (Springer, Berlin Heidelberg, 2004), pp. 57–74.	177
22. The Virus of Relativistic Mass in the Year of Physics <i>Gribov Memorial Volume “Quarks, Hadrons and Strong Interactions: Proc. of the Memorial Workshop Devoted to the 75th Birthday of V. N. Gribov</i> , Budapest, Hungary, 22–24 May 2005, eds. Yu. L. Dokshitzer, P. Levai and J. Nyiri (World Scientific, 2006), pp. 470–473.	195
23. The Concept of Mass in the Einstein Year <i>Proc. of the 12th Lomonosov Conf. on Elementary Particle Physics “Particle Physics at the Year of 250th Anniversary of Moscow University”, ed. A. I. Studenikin</i> (World Scientific, 2005), pp. 1–15.	199
24. Photons: History, Mass, Charge <i>The Photon: Its Hundred Years and the Future. Part I. Acta Physica Polonica B</i> 37 (2006) 565–573.	215
25. Formula $E = mc^2$ in the Year of Physics <i>The Photon: Its Hundred Years and the Future. Part II. Acta Physica Polonica B</i> 37 (2006) 1327–1332.	225
26. Mirror Particles and Mirror Matter: 50 Years of Speculation and Search <i>Physics–Uspekhi</i> 50 (2007) 380–389.	231
27. The Impact of the Sakata Model <i>Proc. of the Intern. Symposium “The Jubilee of the Sakata Model”, Nagoya Univ., Japan, 24–25 December, 2006</i> eds. M. Harada, Y. Ohnuki, S. Sawada and K. Yamawaki, <i>Progr. of Theor. Phys. Suppl.</i> 167 (2007) 163–174.	241
28. The Evolution of the Concepts of Energy, Momentum, and Mass from Newton and Lomonosov to Einstein and Feynman <i>Proc. of the 13th Lomonosov Conference on Elementary Particle Physics</i> , 23 August 2007, Moscow State University, ed. A. I. Studenikin (World Scientific, 2008), pp. 20–35.	253
29. The Einstein Formula: $E_0 = mc^2$. “Isn’t the Lord Laughing?” <i>Physics–Uspekhi</i> 178 (2008) 513–527; arXiv:0808.0437	269

30. The Theory of Relativity and the Pythagorean Theorem 285
Physics–Uspekhi **178** (2008) 622–631; arXiv:0809.2379
